When:	Wednesday, April 13th, 2016 6:00 PM - 6:30 PM Registration
RSVP	Constant Contact E-mail Response Required by Monday April 11th 2016. If no invitation was received call 1 866 MYAPICS or (866-692-7427) Ext 105 or e-mail to: APICS.Pittsburgh@gmail.com Please include your name, daytime telephone number, type of Membership, and your Company affiliation.

President's Message

The Pittsburgh Chapter would like to commend all the students who participated in the Mid Atlantic District Student Case Completion held in February. They were professional and presented a good grasp of the APICS Body of Knowledge in presenting their solutions. The Pittsburgh Area had two local teams in the competition. The University of Pittsburgh and Robert Morris University. Congratulations to Robert Morris for achieving third place in their first student APICS student case competition. The University of Pittsburgh was awarded first place and will represent the Mid Atlantic District at the APICS 2016 International Conference in Washington DC. Good luck Pitt.

The March PDM provided an excellent networking opportunity during dinner. I applaud the Robert Morris student adviser for making sure that her students were circulated throughout with the professional members. Networking sessions should be looked at as an investment in your future. There is no better place to start building your professional network that at a PDM with other Supply Chain professionals. Remember the Six degrees of separation theory.

Please review the [web site for the proposed Chapter By-Law changes](#) and candidates for the Chapter's Board of Directors ([President: Tom Brown](#), [Executive VP: Kevin Little](#), [VP Finance: Ed Giacchino](#)). Both of these topics will be voted on by the membership at the May PDM.

Thank you for being part of the APICS Pittsburgh Chapter. If you have any questions or comments, please feel free to contact me at 1-866 MY APICS extension 100 or thomassbrown@eaton.com.

February membership totals came in at 46,853. New members totaled 2,134 and new student members totaled 960.

**JOIN APICS FOR A PRINCIPLES OF MRP SEMINAR IN PITTSBURGH
August 11, 2016**

Materials Requirements Planning (MRP) is a vital component in the supply chain. It acts

Congratulations Bill Geisler, CSCP!

The Duquesne University student chapter of APICS was pleased to award Bill Geisler the Student Chapter Mentor of the Year Award. Bill was involved with both the Duquesne Supply Chain Connection as well as hosting an event for potential job seekers on campus. Bill's involvement is appreciated by the entire Duquesne Supply Chain program, as well as the APICS Pittsburgh Chapter.

Congratulations to the University of Pittsburgh for winning the Mid Atlantic District Student Case Competition!

University of Pittsburgh: L to R: David Uber, Sneha Kumari, Dr. Prakash Mirchandani (advisor), Michelle Masters, Rohan Pande

Great job Robert Morris University for placing third in your first Mid Atlantic District Student Case Competition!

as the bridge between master planning and production in a system. MRP helps to determine requirements and keep priorities. The APICS Principles and Practices of MRP seminar assists beginning and experienced planners using a MRP system. Through classroom discussion and practical, hands-on exercises, this seminar will help attendees gain a firm understanding of the principles and functions of MRP in the manufacturing process.

Price

APICS Member \$299
Nonmember \$399

**Certification Maintenance
Points Opportunity
Pitt Center for Supply Chain
Management Breakfast
Event**

**April 8, 7:00 - 9:15 AM
Alumni Hall, University of
Pittsburgh**

Announcing the next Breakfast
Networking and Informational Event,
which is being presented by the Center
for Supply Chain Management at the
University of Pittsburgh.

**A CEO's Perspective on Supply
Chain Management**

As a supply chain management professional, you work hard and fight the good fight every day to optimize the supply chain and improve performance. At the next Breakfast Speaker Series, we will hear the perspective from the C-suite about supply chain management opportunities, challenges, and risk.

Dawne S. Hickton, former CEO of RTI International Metals and current director of the Federal Reserve Bank of Cleveland, will discuss the importance of supply chain management for achieving growth and profitability across the entire organization. Understanding this kind of top-level viewpoint can greatly help supply chain management professionals at all stages of their careers.

For more information and to register for the event, please access the following link:
<http://www.business.pitt.edu/katz/breakfast-speaker-series>

**Duquesne Student Chapter Member's
Oracle Conference Reflections**

Nick Hoch, Senior, Duquesne University

Earlier this year, I had the pleasure of attending the Modern Supply Chain Experience hosted by Oracle with some of my fellow classmates. We were selected for this event after we applied and attended as "Future Supply Chain Leaders." The event was an incredible experience that allowed me to get first-hand knowledge of where supply chain is headed. The most emphasized aspect at the conference was the cloud. The cloud is supposed to be the next big wave in supply chain and Oracle was reaching out to us for a chance to learn more about it. Along with the great opportunity to learn more about supply chain with others who are involved in the industry, networking was an important part of the event. There would be networking sessions that allowed everyone in attendance to roam around to different booths and meet each other. This was an excellent opportunity and an event I would suggest to other supply chain professionals to attend given the chance.

Aaron Wilkinson, Senior, Duquesne University

Having the opportunity to attend the Modern Supply Chain Experience sponsored by Oracle as part of the Future Supply Chain Leaders (FSCL) program was perhaps one of the most valuable and exciting experiences during my time in the business program at Duquesne University. While at the conference I had the opportunity to network with both supply chain professionals and my fellow peers

Chapter Management Excellence is an integral component to enhancing the member experience. Successful APICS chapters provide their members with opportunities for stellar education, career development, and networking.

The APICS Chapter Benchmarking and Recognition (CBAR) program recognizes chapters that have exceeded minimum standards and exemplify excellence in overall chapter management. We are proud to announce the APICS Pittsburgh Chapter received the **2015 CBAR Platinum** Award designation, an admirable accomplishment for an APICS chapter.

As a member of an APICS Platinum Award Winning Chapter, the CBAR designation signifies your chapter's commitment to providing an exceptional membership experience.

pursuing similar majors and made many connections that I anticipate will last as my career in the supply chain field advances. It was truly a great experience to just be able to sit in and absorb all of the information the conference had to offer and see some of the emerging technologies that Oracle was highlighting, including their cloud computing technologies. In addition to that, all of the keynote speakers were exceptionally captivating and provided us with much insight. As a whole, the experience is one I will not soon forget and would encourage anyone who has the opportunity to do so to attend.

Matt Schuetz, Senior, Duquesne University

In January, my fellow classmates and myself were afforded the opportunity to attend the Oracle Modern Supply Chain Experience in San Jose, California. During our time, we were part of a group of over 100 of the best in brightest students in the supply chain field: "The Future Supply Chain Leaders". We were given the chance to network with professionals, as well as attend multiple sessions to become more familiar with Oracle business solutions and industry knowledge. I feel that we represented both Duquesne University and the APICS Pittsburgh Chapter well and I believe that it was a very worthwhile endeavor. I would recommend the experience to any students who are looking to expand their network and knowledge of the growing trends in the supply chain.
